

## **Work Contributing to Regional Plan Implementation Undertaken by Other Departments**

### **Assistance to the Riversdale Dune Management Group**

Soil Conservation staff have provided regular, ongoing technical support to the Riversdale Dune Management Group. More recently, Resource Policy staff have provided assistance, information and advice to this group.

### **Review of the Wellington Regional Council Contaminated Sites Management Programme**

Resource Quality staff have produced a draft review of the Wellington Regional Council Contaminated Sites Management Programme. This is currently being circulated to appropriate stakeholders.

### **Contaminated Sites Project**

Resource Quality staff have been involved in a number of activities associated with a larger contaminated sites project. These have included maintaining and updating the Regional ANZECC site use database, a timber treatment plant investigation and a closed landfill investigation.

### **Riparian Management Group**

A Riparian Management Group has been meeting over the past year under the Regional Policy Statement budget. The progress of this group is reported in the Regional Policy Statement implementation report to Council.
