2013 WTSM Land Use

1. Introduction

This technical note documents the preparation of the 2013 base year land use data input to WTSM.

Land use includes population, households and employment – all sourced from Census. It also includes education places sourced from the Ministry of Education.

This note includes the specification to obtain the Census land use data (Appendix A), the education data, the post-processing undertaken, and a summary of key issues and how these were resolved. It also presents a summary of the resulting WTSM land use - and how it compares to the 2006 and 2011 land use that was previously input to the model.

Final 2013 land use tables are provided in Appendix B.

2. Persons

A table was supplied by Statistics NZ of the WTSM person categories, residuals and totals by age group - all by WTSM zone. The specification supplied to Statistics NZ for this table is in Appendix A.

In some of the cells due to small numbers, Statistics NZ replaced the actual value with "C"s. The "C"s were replaced with a number between 0 and 6 to get the correct zonal total. Sometimes the correct zonal total was greater than the total reached, but as a "C" only represents a number less than 6 it would be incorrect to replace it with a value greater than 6. Where a total was "C" it was replaced with a zero along with the subcategories. For example where the Total Young Adults was "C" (which means that it is 6 or less) it was replaced with a zero, along with all the Young Adult categories in that zone (which would also be "C"). The logic for this is that as there are 3 Young Adult categories each of them would have an average value of less than 2. To quantify the magnitude of the issue, for the data supplied by Statistics NZ, 252 (9.3%) out of 2,700 persons category cells had a "C" in them.

The residual categories were those where their Work and Labour Force Status (WLFS) was unidentifiable, but who could be placed in one of the age categories (e.g. Young Adult). These were initially pro-rated across the relevant sub-categories. For example, if Young Adult Full Time Employed (excluding the residuals) made up 40% of the total Young Adults in that zone it would receive 40% of the Young Adult residual.

This approach resulted in a relatively significant increase in employed persons between 2006 and 2013 which was inconsistent with the much less pronounced growth shown in the Statistics NZ data that was identified (i.e. excluding the "unidentifiable"). In investigating, it was found that the residual category had increased significantly and that the method of allocating this residual was producing more growth in employed persons than the identifiable data (defined as the data that has been allocated, i.e. excluding the WLFS unidentifiable) suggested. The population figures for 2006 and 2013 are shown in the following table including the WLFS unidentifiable.

PERSONS FROM CENSUS			
Category	2006	2013	Growth
Employed	229,485	233,676	1.8%
Adult Other	104,673	117,540	12.3%
WLFS Unidentifiable	9,102	16,038	76.2%
Total	343,260	367,254	7.0%
% Unidentifiable	2.65%	4.37%	

Table 1: Population for 2006 and 2013 including "Unidentifiable"

This indicated that the assumption that people with undefined labour status follow the same distribution in Employed and Other as people with known status was incorrect. It appears more likely that these residuals would belong to the Other than to the Employed category.

An alternative method of allocating the residual was therefore adopted for the 2013 land use data. The residual was allocated to either Employed or Other categories such that the observed (from Statistics NZ website) 2006 to 2013 change in share of each category as a proportion of the total was maintained, and this was carried out at a Territorial Authority (TA) level. For example, observed data showed that the share of adults who are employed decreases to 68.6% of all adults in Wellington City in 2013 from 2006, whereas the ratio achieved with the initial "pro-rata" approach was 71.1%. The new approach enabled matching the observed value of 68.6%. The same methodology was used for other TAs. While this approach is still an approximation, as the real breakdown of residual in Employed and Other category is by definition unknown, it was determined to be a better alternative than using the simple ratio of Employed vs Other defined people. It must also be noted that residual amounts to circa 4% of the total adult population, therefore the amount of population that is manually reallocated is actually minimal.

3. Households

A table (specification in Appendix A) was supplied by Statistics NZ of the WTSM household categories with residuals by number of adults.

The residual categories exist as in some cases Statistics NZ doesn't know the employment status of the adults in the household. The residual categories were pro-rated over the relevant categories. For example, for one person households if one adult employed has 40% of the total one adult households then it would get 40% of the residual. There were no issues with the allocation of the residuals for households (unlike for persons) as trip making in the transport model is primarily driven by person types (hence more sensitivity to the allocation of residuals).

4. Employment

Two tables (specification in Appendix A) were supplied by Statistics NZ of WTSM zones by the two types of employment categories ("normal" and HCV).

As well as the WTSM employment categories there was also a category for missing industry (ANZSIC) code and a considerable number of categories for where the workplace address was incomplete or missing and the person could not be coded to a meshblock - which is needed to code to a WTSM zone. Therefore, the employment data received included five types of data that required further allocation / processing:

- Missing industry - these were pro-rated across the WTSM industries, based on the share that each WTSM industry had of the total;
- Area Unit not further defined (a lot of categories due to the number of area units in Wellington) – these represent 2% of total employment in the final land use;
- Territorial Authority not further defined (NFD) – 3% of total employment;
- Wellington Region not further defined – 1% of total employment; and
- NZ not further defined – 7% of total employment.

The "C"s (see discussion under Persons) were replaced by a value which resulted in the total by industry almost equalling the total for all the zones supplied by Statistics NZ. This also resulted in the zonal total by industry being closer to the zonal total supplied by Statistics NZ. For each zone the industry Missing category was then pro-rated across the other industries in that zone.

For the Manufacturing & Agriculture, Mining & Construction categories the "C"s were replaced with 2.9 and 3.0 respectively for the reasons mentioned in the preceding paragraph. For these categories the Wellington City & Region NFD were then pro-rated across the WTSM zones. The other TAs were not allocated as the NFD numbers were relatively small.

For the "normal" employment categories the Area Unit NFD employment was allocated to a WTSM zone based on the fraction of the area unit in each WTSM zone. The TA NFD, Region NFD and NZ NFD were then pro-rated across the relevant WTSM zones. For NZ NFD, 11.2% of it was allocated to the WTSM zones as this is the percentage of New Zealand's employment that is in Wellington.

5. Education

School (primary and secondary) and tertiary roll data was provided by the Ministry of Education.

In terms of processing, addresses were provided for schools and meshblocks for tertiary institutions, which enabled coding the location to a WTSM zone.

The tertiary rolls are segmented by site (for example, Victoria University has a number of sites around Wellington), but do not distinguish between those who travel to that site and those who are taught by someone based at that site. For example, 2489 people were recorded as attending Playcentre Education in Tawa - this is not the case as only their education co-ordinator is based here with the courses being delivered around the country. No adjustment was introduced for this issue as comparisons with the 2011 land use indicated the datasets were consistent (in terms of similar numbers of tertiary places per WTSM zone). The model coefficients would therefore have been estimated with this anomaly included.

6. Summary by TA

Table 2 presents the resulting land use input to WTSM, showing population, household and employment totals per TA and for the whole region. Totals are shown for the updated WTSM land use based on 2013 Census, as well as both the 2006 version of WTSM based on 2006 Census and the 2011 version based on estimates. Percentage growth from 2006 is also reported.

Area	POPULATION				
	2006 Census	2011 Estimate	% Growth from 2006	2013 Census	% Growth from 2006
Wellington	179,941	192,317	6.9%	190,859	6.1%
Porirua	48,667	50,362	3.5%	51,687	6.2%
Kapiti	46,260	49,085	6.1%	49,083	6.1%
Upper Hutt	38,573	40,188	4.2%	40,191	4.2%
Lower Hutt	97,911	99,678	1.8%	98,194	0.3%
Wairarapa	38,669	39,429	2.0%	41,124	6.3%
Region	450,021	471,060	4.7%	471,138	4.7%
Area	HOUSEHOLDS				
	2006 Census	2011 Estimate	% Growth from 2006	2013 Census	% Growth from 2006
Wellington	67,669	72,274	6.8%	70,413	4.1%
Porirua	15,372	15,938	3.7%	16,737	8.9%
Kapiti	19,105	20,283	6.2%	20,295	6.2%
Upper Hutt	14,121	14,673	3.9%	14,907	5.6%
Lower Hutt	35,326	35,936	1.7%	35,652	0.9%
Wairarapa	15,262	15,562	2.0%	16,623	8.9%
Region	166,855	174,665	4.7%	174,627	4.7%
Area	EMPLOYMENT				
	2006 Census	2011 Estimate	% Growth from 2006	2013 Census	% Growth from 2006
Wellington	129,947	135,785	4.5%	137,264	5.6%
Porirua	14,673	15,241	3.9%	15,112	3.0%
Kapiti	14,539	15,206	4.6%	14,037	-3.5%
Upper Hutt	12,099	11,923	-1.5%	11,345	-6.2%
Lower Hutt	44,068	44,135	0.2%	40,464	-8.2%
Wairarapa	18,239	18,208	-0.2%	17,540	-3.8%
Region	233,565	240,498	3.0%	235,760	0.9%

Table 2: Land Use Totals and Growth Per TA

Results show that total population and household numbers for the region are very similar between the 2011 estimates and 2013 Census. The fact that figures are similar despite the two-year difference suggests that the 2011 estimates were slightly over-optimistic in terms of population growth, although the difference between the estimate and the actual population in 2011 would have been small.

However the differences are more marked at a TA level, with Wellington and especially Lower Hutt growing less than estimated during this period, while Porirua and Wairarapa population has increased more than what was estimated.

Considering employment, the total growth for the region in 2013 is less than one third of what the estimated growth to 2011 was. This likely results from the 2011 employment being estimated which was achieved by applying growth rates from the Business Demography (Frame) between 2006 and 2010 to the 2006 WTSM employment. This low growth in employment (2006 to 2013) is likely to be related to the economic downturn from 2008 and to public sector job cuts which particularly affected the Wellington region. It must be noted that a decrease in employment was taken into account in the WTSM 2011 land use estimates, but only by reducing the “number of employed adults” in the population component, which drives the numbers of work-related trips in the model. Actual jobs numbers and locations only distribute these trips spatially and were therefore not adjusted. As a result the amount of work-related trips in WTSM 2011 was reflecting the trend of low growth in employment.

For employment at a TA level, there is a marked difference between Wellington and Porirua which have both increased, and the rest of the region which has decreased, particularly in the Hutt Valley. This indicates a further concentration of jobs in what already were the more economically dynamic parts of the region, which is also highlighted by manufacturing and other primary industry employment having decreased significantly (-15%), while services employment have increased by 9%.

For more clarity, the results in Table 2 are illustrated in Figures 1 to 3 below, which show the increase in population, households and employment per TA in 2013, indexed to 2006. The round markers also indicate what the 2011 estimates were.

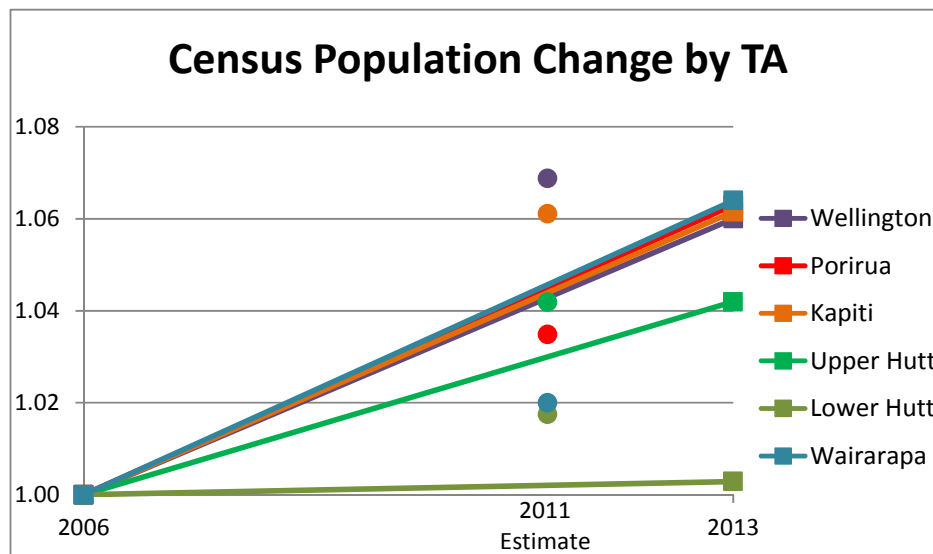

Figure 1: 2006-2013 Population Growth by TA

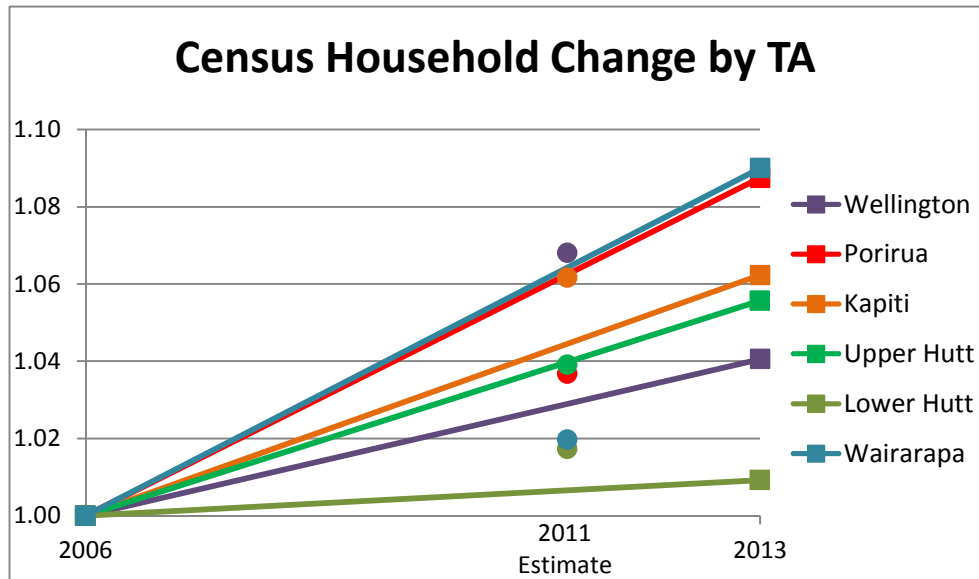

Figure 2: 2006-2013 Households Growth by TA

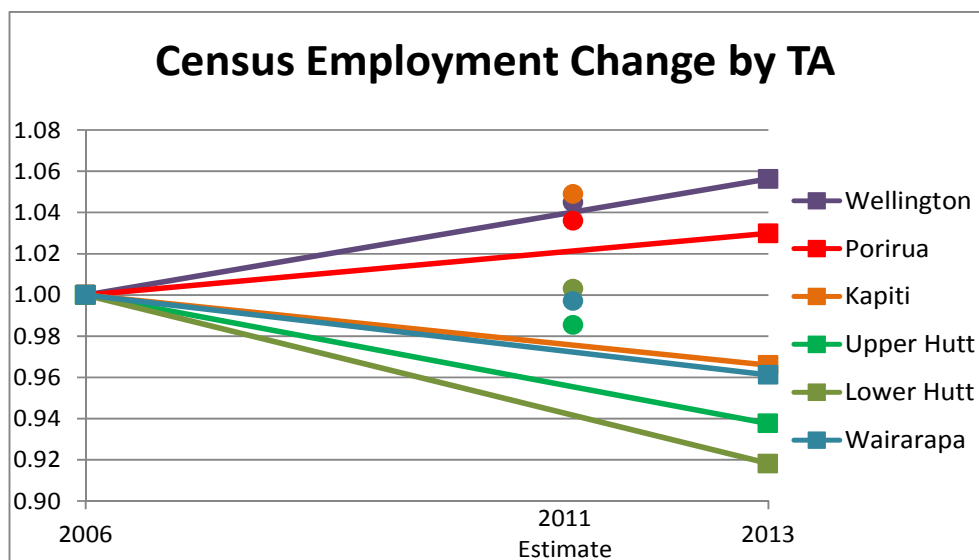

Figure 3: 2006-2013 Employment Growth by TA

Appendix A

Census Specification for Land Use Data

A.1 Overview

- The Census Usually Resident Population Count is used. (WTSM Demographic Projections Report 2006 Base Run, S2.1.1);
- The references are to the 2013 Census Data Dictionary, with the page numbers at the end of many variables. The numbers in brackets after the first part of the variable name {e.g. "Age - Five Year Groups (21)} is the number of categories, in this case there are 21 five year age groups for which the data can be supplied;
- Each variable is required tabulated by WTSM zone; an equivalence table to 2013 meshblocks is attached; and
- Totals by Territorial Authority (TA) and for the whole of the modelled area (Wellington Region) were requested.

A.2 Person Definition

- Infants (0 to 4 years) - Age – Five Year Groups (21) 01 0-4 Years, p 59;
- Children (5 to 10 years) - Age – Five Year Groups (21) 02 5-9 Years, p 59;
- Children (11 to 16 years) - Age – Single Years (121) 011, 012, 013, 014, 015, 016;
- Total Children (0 to 16 years) - Age – Five Year Groups (21) 01 0-4 Years, 02 5-9 Years, 03 10-14 years, 015, 016 p 59;
- Young Adult (17-25 years) Full Time (work) - Age – Single Years (121) 017, 018, 019, 020, 021, 022, 023, 024, 025 AND Work and Labour Force Status (5) 1 Employed Full-time. (p 94) Note that the Stats definition of Full Time Employment is 30 or more hours per week;
- Young Adult (17-25 years) Part Time (work) - Age – Single Years (121) 017, 018, 019, 020, 021, 022, 023, 024, 025 AND Work and Labour Force Status (5) 2 Employed Part-time. (p 94);
- Young Adult (17-25 years) Other - Age – Single Years (121) 017, 018, 019, 020, 021, 022, 023, 024, 025 AND (Work and Labour Force Status 3 Unemployed OR Work and Labour Force Status 4 Not in the Labour Force);
- Young Adult (17-25 years) total - Age – Single Years (121) 017, 018, 019, 020, 021, 022, 023, 024, 025;
- Adult (26-65 years) Full Time (work) - Age - Single Years (121) , Age 26, 27, 28, to 64, 65. Alternatively an appropriate selection of Age – Ten Year Groups (11) and Age – Five Year Groups (21) and Age - Single Years (121) AND Work and Labour Force Status (5) 1 Employed Full-time. (p 94);
- Adult (26-65 years) Part Time (work) - Age - Single Years (121), Age 26, 27, 28 to 64, 65. Alternatively an appropriate selection of Age – Ten Year Groups (11) and Age – Five Year Groups (21) and Age - Single Years (121) AND Work and Labour Force Status (5) 2 Employed Part-time. (p 94);
- Adult (26-65 years) Other - Age - Single Years (121) , Age 26, 27, 28 to 64, 65. Alternatively an appropriate selection of Age – Ten Year Groups (11) and Age – Five Year Groups (21) and Age - Single Years (121) AND (Work and Labour Force Status 3 Unemployed OR Work and Labour Force Status 4 Not in the Labour Force);

- Adult (26-65 years) Total - Age - Single Years (121), Age 26, 27, 28 to 64, 65. Alternatively an appropriate selection of Age – Ten Year Groups (11) and Age – Five Year Groups (21) and Age - Single Years (121);
- Older Adult (>65 years) Full Time (work) - Age 66, 67, 68 to 119, 120. Alternatively an appropriate selection of Age - Single Years (121), Age – Five Year Groups (21) & Age – Ten Year Groups (11) on p 25 & 26 AND Work and Labour Force Status (5) 1 Employed Full-time. (p 94);
- Older Adult (>65 years) Part Time (work) - Age 66, 67, 68 to 119, 120. Alternatively an appropriate selection of Age - Single Years (121), Age – Five Year Groups (21) & Age – Ten Year Groups (11) AND Work and Labour Force Status (5) 2 Employed Part-time. (p 94);
- Older Adult (>65 years) Other - Age 66, 67, 68 to 119, 120. Alternatively an appropriate selection of Age - Single Years (121), Age – Five Year Groups (21) & Age – Ten Year Groups (11) AND (Work and Labour Force Status (5) 3 Unemployed OR Work and Labour Force Status (5) 4 Not in the labour force;
- Older Adult (>65 years) Total - Age 66, 67, 68 to 119, 120. Alternatively an appropriate selection of Age - Single Years (121), Age – Five Year Groups (21) & Age – Ten Year Groups (11);
- Residual - Work and Labour Force Status - 9 Work and Labour Force Status Unidentifiable by the following age categories; under 17, 17 to 25 years, 26 to 65 years, >65 years and a total for all age categories;
- Total Population.

The specification for the Infant and Children categories were taken from the TripEndInputData spreadsheet. The specification for the Young Adult, Adult & Older Adult categories were taken from TN16.1 Trip End Report, July 2003.

A.3 Household Definition

- 1 Adult Employed - Household Composition Level 1 (6) - 5 One-person Household, p 26 AND FOR THE ADULT HOUSEHOLD RESIDENT (Work and Labour Force Status (5) 1 Employed Full-time. (p 94) OR Work and Labour Force Status (5) 2 Employed Part-time. (p 94)). Note that the first part refers to the household and the second to the person in the household;
- 1 Adult Non Employed - Household Composition Level 1 (6) - 5 One-person Household, p 26 AND FOR THE ADULT HOUSEHOLD RESIDENT (Work and Labour Force Status (5) 3 Unemployed OR Work and Labour Force Status (5) 4 Not in Labour Force);
- 2 Adults (min of 1 employed) - Usual Residents Aged 15 and Over in the Household, Number of (21) - 02 Two usual residents AND FOR THE ADULT HOUSEHOLD RESIDENTS one or both of them is Work and Labour Force Status (5) 1 Employed Full-time. (p 94) OR Work and Labour Force Status (5) 2 Employed Part-time. (p 94);
- 2 Adults neither employed - Usual Residents Aged 15 and Over in the Household, Number of (21) - 02 Two usual residents AND FOR THE ADULT HOUSEHOLD RESIDENTS both of them (Work and Labour Force Status (5) 3 Unemployed OR Work and Labour Force Status (5) 4 Not in the Labour Force);

- 3+ Adults - Usual Residents Aged 15 and Over in the Household, Number of (21) - 03 or greater;
- 1 Adult residual - Household Composition Level 1 (6) - 5 One-person Household, p 7 AND FOR THE ADULT HOUSEHOLD RESIDENT (Work and Labour Force Status (5) 9 Work and Labour Force Status Unidentifiable);
- 2 Adults residual - Usual Residents Aged 15 and Over in the Household, Number of (21) - 02 Two usual residents AND FOR THE ADULT HOUSEHOLD RESIDENTS one or both of them is Work and Labour Force Status (5) 9 Work and Labour Force Status Unidentifiable) AND they don't fall into one of the other categories;
- Household comprising children only;
- Remainder - based on households comprising 15 or 16 year olds only or households where all the usual residents aged 17 years and over are absent (as per revamped table supplied for 2006 data order);
- 3Total Households;

Adults are based on usual residents in household on census night, age 17 years and over (excludes absentees).

Number of employed is based on usual residents in households on census nights, age 15 years and over (excludes absentees). (Unchanged from original specification in August 2013).

A.4 Employment Definition

We require for the classifications WTSM Industry (used for person trip generation) and HCV Industry (originally used for HCV trip generation in the 2001 to 2011 model versions) in this table cross tabulated by WTSM zone using the workplace address for the Census Usually Resident Population count of those aged 15 years & over (Table source: WTSM Demographic Projections Report 2006 Base Run). For those whose workplace is spatially not sufficiently well defined to assign them to a WTSM zone, then we require those who are assigned to an Area Unit or higher spatial level (e.g. TA or Wellington Region) not further defined. We also require a total by WTSM zone and for the whole of Wellington Region.
