

Submitter Details

Submitter No.	S70
Submitter Name	Harmony Energy NZ #2 Limited
Date received	14/10/2022

Notes

Number of uploaded docs 0

Submission Points

The following table lists all of the submission points made by this submitter. The details of each submission point can be edited by clicking the 'edit' link, editing the information and then clicking 'submit'.

If you can't find the provision by typing the number, try typing a word in the body of the provision. For example, typing 'polic' will bring up all provisions that have the word 'policy' in their name.

If you need to void (delete) a submission point, click the 'edit' link and change the 'Status' field to 'Void'. Once the 'submit' button has been clicked, the submission point will be removed from the table and any reports.

Reporting Topic	Submission Point	Plan section	Provision	Support/Oppose	Reasons	Decision Requested	Mapping	Scope	Scope recomm
-----------------	------------------	--------------	-----------	----------------	---------	--------------------	---------	-------	--------------

Raw uploaded submission points

This table contains raw submission point data that has been uploaded from the Council's online submission form. These submission points need to be transferred into Spoken by adding them as submission points using the 'Add submission point' form below or clicking on 'upload directly'. Once the raw uploaded submission has been added into Spoken, please confirm by selecting 'yes' in the 'uploaded into Spoken' field. Submission points that have not been 'lodged' are able to be edited by the submitter until either they have finalised and lodged their submission or after the submission closing date, so consider not summarising those points early.

Raw sub point	Plan section	Provision	Support/oppose	Decision sought	Reasons	Entered into Spoken	Upload directly
S70.1	Chapter 3.1A: Climate change	Objective CC.3	Support in part	Adoption of Policy package Option 3 (alternative with additional measures)	<p>Although RPS PC1 provides a high level policy framework for considering utility scale RE generation, it does not require plans to promote and enable new generation via rules – except with regard to very small scale development.</p> <p>The absence of prescriptive rules appears to be a gap that does not adequately reflect intentions signaled by other parts of the RPS PC1, including policies 7, 39 and 11. There are very strong intentions signaled by Section 3.1A "Climate Change". Among other things, this includes "key areas of action required to address climate change". That is, "Reduce gross greenhouse gas emissions. This includes transitioning as rapidly as possible from fossil fuels to renewable energy".</p> <p>We believe that Adoption of the policy package Option 3 provides a stronger framework for achieving the core objectives of CC.3. Namely to reduce net emissions by 50% from 2019 levels by 2030, with net zero by 2050.</p>	No	upload...
