

Submitter Details

Submitter No.	S84
Submitter Name	Tony Randle
Date received	14/10/2022
Notes	
Number of uploaded docs	0

Submission Points

The following table lists all of the submission points made by this submitter. The details of each submission point can be edited by clicking the 'edit' link, editing the information and then clicking 'submit'.

If you can't find the provision by typing the number, try typing a word in the body of the provision. For example, typing 'polic' will bring up all provisions that have the word 'policy' in their name.

If you need to void (delete) a submission point, click the 'edit' link and change the 'Status' field to 'Void'. Once the 'submit' button has been clicked, the submission point will be removed from the table and any reports.

Raw uploaded submission points

This table contains raw submission point data that has been uploaded from the Council's online submission form. These submission points need to be transferred into Spoken by adding them as submission points using the 'Add submission point' form below or clicking on 'upload directly'. Once the raw uploaded submission has been added into Spoken, please confirm by selecting 'yes' in the 'uploaded into Spoken' field. Submission points that have not been 'lodged' are able to be edited by the submitter until either they have finalised and lodged their submission or after the submission closing date, so consider not summarising those points early.

S84.1	General comments	General comments - overall	Oppose in part	I request the public consultation on Proposed Change 1 to the Regional Policy Statement be extended until the end of November so that the public can have the time to go through the information during this quiet period and provide informed feedback on the proposed changes.	<p>The GWRC choosing to undertake public consultation during the end of the council triennium is wrong. The beginning of the consultation period coincided with a number of other public consultations including the Proposed Wellington District Plan. The end of the consultation period was during the election for councils where most stakeholders were focused with election related activities.</p> <p>Proposed Change 1 to the Regional Policy Statement for the Wellington Region is both complex and difficult to understand. The public consultation should have been undertaken during a period when public stakeholders had time to properly understand the proposed changes and be able to submit on an informed basis. As a member of a community association that would likely have submitted on this change, we are not doing a submission because we have been overwhelmed by previous submissions and</p>	No	upload...

our duties to the community to support the election process (the Johnsonville Community Association hosted 3 public election meetings including one for Regional Council candidates for Wellington City).

I believe consulting the public on the proposed changes during this time period is undemocratic and largely negated the purpose of the consultation.
